

The Maine Pie Co. Sees 4x Improvement In Efficiency With Industrial Packaging

“The best service I have had in 20 years”

“The Maine Pie Co. is now 4 times more efficient than before connecting with Industrial Packaging.”

The Maine Pie Company produces artisan, frozen, uncooked gluten-free pies, tarts and pie shells. Owner, Jill Miller, began a full-service bakery 11 years ago in upstate New York with her husband, Lou. From there the pair journeyed to the seacoast of Maine and opened a flourishing pie company that caters to gluten intolerant pie-lovers. They are continuing to do great things in Biddeford Maine!

When Jill reached out to Industrial Packaging, she was looking to streamline the process of hand-packaging all of her baked goods while allowing her business to remain cost-competitive. The process was taking two people a full day to package their delicious creations by hand.

After an in-house visit with one of our Packaging Specialists, Tom Carroll, it was clear that there were opportunities for The Maine Pie Co. to produce more while saving on costs and time. Tom was able to provide a sensible solution that included a combo L-sealer that would significantly reduce the labor hours needed for packaging. After implementing the new L-sealer, what took a full day of hand-packaging can now be completed in only 3 hours with the same number of people!

After doing the math, Jill can say with confidence that The Maine Pie Co. is now 4 times more efficient than they were before connecting with Industrial Packaging. Additionally, their delicious goods now have a more professional appearance with a low-cost pre-made shrink bag.

The Maine Pie Co. Continues to do business with Industrial Packaging because of the professional response they receive with each call for a materials order or service question.

The fact that Tom and the Industrial Packaging team are knowledgeable while also providing competitive pricing for her business to run successfully makes this a winning relationship.
